

Awareness from the Inside Out

Extended convenience, comfort, and control

A New Kind of Awareness

The world is changing faster than ever. So is the technology that keeps your household safe, secure, and running smoothly.

Alarm.com has transformed the traditional security system into an increasingly more personalized, predictive, and proactive experience. Because the things you care about extend past the four walls of your home, and so should your security.

Protect what's most important—no matter where it is—with Alarm.com.

Video Analytics

Get more insights with fewer interruptions

Traditional video monitoring alerts can generate information overload. With Video Analytics, you can customize and filter your video alerts to focus only on the activity you want to know about. You can pick and choose whether you get alerts for people, vehicles, or animals entering or leaving specific areas of your property.

Video Analytics alerts are rapid, relevant, and reliable—so you can rest easy knowing your cameras have you covered. Supercharge your cameras with added capabilities—powered by Video Analytics:

LIGHTS AUTOMATION

Turn on the lights when a camera detects a person, animal, or vehicle to make it look like someone's home and deter unwanted visitors.

HIGHLIGHTS

Watch a daily update of important events and easily share or save video clips from your app.

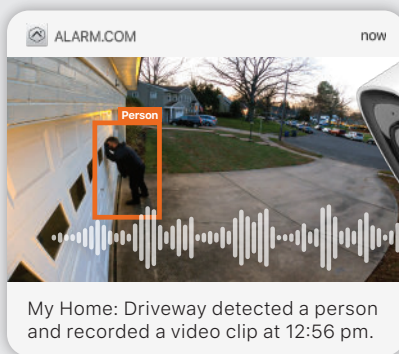

PEOPLE DETECTION FOR MONITORING STATIONS

Quickly verify whether an alarm requires an emergency response, reducing false alarms and promoting faster emergency responses for verified alarms.

Perimeter Guard™ for Proactive Defense

Stop unexpected visitors in their tracks with Perimeter Guard proactive defense. Alarm.com's advanced Video Analytics will sound an alert and flash a camera's LED to deter potential intruders.

Ask your service provider about adding Video Analytics-compatible cameras to your service package.

Flex IO™

Secure more of what matters—without boundaries

Protect property and equipment anywhere with Flex IO, a wireless, weatherproof sensor with virtually no range limitations. This long-lasting, battery-powered sensor uses LTE to self-monitor property and assets anywhere.

You can use Flex IO to monitor and protect:

- + Tools and equipment including tractors, lawn mowers, golf carts, trailers, and more
- + Gates, doors, and fences
- + Freestanding sheds, barns, storage units, and more

Excessive Speed Alert: Jane's Car exceeded the speed threshold of 65mph at 8:37 am.

Connected Car

Connect home and car with real-time status and safety alerts

Stay a step ahead of roadside emergencies and costly repairs with Connected Car, a device that connects your family's car and home in one fully integrated, seamless experience.

With maintenance alerts, driver behavior data, location tracking, and more, you'll always be in the know—on the road or on-the-go.

VEHICLE DIAGNOSTICS

Get an alert if the Check Engine light comes on, your battery is low, or you need to refuel.

FAMILY DRIVING

When a loved one is behind the wheel, you'll get an alert for excessive speeding, sudden acceleration, or hard braking.

VEHICLE SECURITY

See your car's location at any time and get an alert if your car moves unexpectedly or the sensor is unplugged.

Connect Home and Car

Use Alarm.com Places with Connected Car to enable reminders to secure your home if you forget to lock up. Heading home from work? Alarm.com can automatically adjust the thermostats and turn on the lights when your car is close to home for a warm welcome.

Water Management

Protect your entire home from costly water damage

A few minutes is all it takes for a leaky pipe or split washer hose to cause thousands of dollars in damage. Alarm.com's Smart Water Valve+Meter is a comprehensive water protection solution that detects leaks and shuts them down automatically—before they become a flood.

STOP A FLOOD IN ITS TRACKS

Smart Water Valve+Meter detects leaks, alerts you, and then shuts off the water supply to minimize damage.

SAVE WATER AND MONEY

Receive alerts for excessive water consumption so you can take action and save on everyday water costs.

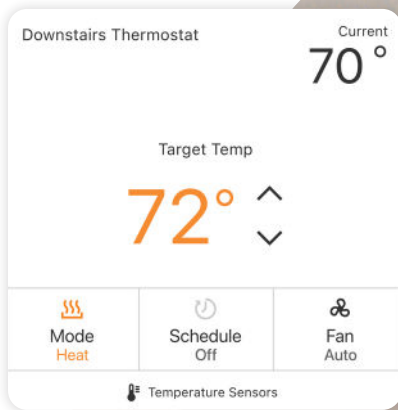

STEER CLEAR OF WINTER FREEZES

Get a heads up when a freeze is headed your way so you can prep your pipes in advance.

Energy Management

Maximize energy savings and reduce your environmental footprint

Keep energy costs down with smart thermostats, lights, and shades. Our all-in-one energy management solution helps you save energy, while customizing your environment for comfort and enjoyment. Add solar panels to the rest of your system with a Solar Monitoring service package and get helpful reports for your home's solar energy production.

Expand your home security and awareness. Get started today.

Alarm.com offers innovative products and services that expand your home's security to include every mission-critical system in your home and beyond, delivering added protection and extended peace of mind.

Your system will be expertly installed and customized to meet your unique needs. Visit [Alarm.com](https://www.alarm.com) to find an authorized service provider near you.
